

# Personal Statement

Hey everyone,

I'm Kyal Sin Ko Ko, or Kevin for short. I'm 15 years old and I'm currently diving into the world of computing. Exploring different subjects like cooking, flying, and programming is what I love doing. I used to go to school in Myanmar, but now I'm tackling a diploma in computing at Y-Max University.

Last year, I got the chance to do an internship where I learned so much about artificial intelligence (AI). It was awesome because I got to work on real projects. Now, I'm really into AI and machine learning, and I'm excited about the possibilities these fields hold for the future.

I've been brainstorming some really cool projects. One of them is an app and device combo that checks if water is safe to drink. Another project I'm excited about is finding a way to get electricity from moonlight. And get this, I'm even thinking about building a drone to explore Mars!

But wait, there's more! I've got this huge idea for a robot that acts just like a human. Imagine it having a brain and muscles like ours, being super smart and strong. It's a thrilling prospect that fuels my passion for robotics and AI.

Right now, I'm working on research for my next possible project, "The Eco Duo," which aims to revolutionize reforestation efforts using autonomous planting robots. This project is close to my heart because it addresses the urgent need for environmental conservation and biodiversity restoration, especially in Myanmar. Working on this project, along with my teammate Aung Tayza, who is new to IT but eager to learn, makes me feel like we're contributing to a better, greener world. We are also open to adding another member who shares our enthusiasm for technology and innovation.

Why Oxford University, you ask? Well, it's a top-notch place for learning, and the chance to meet people from all over the world is just amazing. I can't wait to soak up knowledge from everyone there and share my own ideas too.

Thanks for taking the time to read about me and my interests!

Sincerely,  
Kyal Sin Ko Ko (Kevin)
